Jonah Carpenter

Full Stack / Software Developer from the University of Mississippi
Oxford, Mississippi, United States

Summary

Hi, I'm Jonah!

I'm a soon-to-be graduate with a Bachelor's degree in Computer Science from the University of Mississippi, where I've had the incredible opportunity to deepen my technical expertise and build hands-on experience in development.

Throughout my time at Ole Miss, I've worked on a variety of projects that demonstrate my skills in development, problem-solving, and innovative thinking. Whether it's creating responsive applications, or exploring new technologies, I'm always excited to learn and grow. Curious about my work? Check out my GitHub for a closer look at some of the projects I've been passionate about.

Beyond academics, I honed my problem-solving and customer service skills as a technician at the IT Helpdesk. This experience taught me how to address technical issues effectively while communicating solutions in a clear, user-friendly way—an essential skill for bridging the gap between technology and people.

I'm particularly passionate about leveraging technology to solve real-world problems and improve lives. Whether it's designing software that streamlines workflows or developing tools that enhance user experiences, I'm driven by the potential to make an impact.

As I transition into the professional world, I'm eager to apply my skills in full-stack development, software engineering, and problem-solving to tackle new challenges. If you're looking for a dedicated and versatile developer with a strong foundation in both technical and interpersonal skills, I'd love to connect!
